Annual Siren Test - August 22

The San Luis Obispo County Early Warning System sirens will be tested on Saturday, August 22, 2009. The sirens will sound twice — at noon and again about 30 minutes later — and will last 3 to 5 minutes. This is a test and does not require any action on your part.

During the tests, local radio and television stations will be conducting normal programming. However, if you hear the sirens at any other time go indoors and tune to your local stations for important emergency information and instructions. When at sea, tune to Marine Channel 16.

Saturday, August 22; it's only a test.
